

Give Thanks for an Eco-Friendly Thanksgiving

Between Thanksgiving and New Year's Day, there's a **25% increase in volume of household waste.**

Thankfully, there are easy ways to cut down on waste this Thanksgiving.

Menu Plan

The meal is typically the star of the show on Thanksgiving. Decrease food waste by using the same ingredients for multiple recipes. Try to cook according to portion size for your guests.

Buy Sustainable To-Go Boxes

For leftovers, send your guests home with extra food in compostable to-go boxes or glass containers instead of polystyrene foam.

Break Out the Fine China

Or whatever non-disposable dishware you have. Polystyrene and food-soiled materials aren't recyclable.

Repurpose Leftovers

Save your table scraps for the compost cart. If you have usable leftovers, feature them in new recipes.

Happy Thanksgiving from the Republic Services Family!
